Exhibition Overview

A Four-Day Review of the People, Products and Business Activity That Defined the ***11th Edition***

The ***11th Nepal Buildcon International Expo, held from 5 to 8 February 2026 at Bhrikuti Mandap, Kathmandu,*** brought together the people, products and technologies shaping Nepal's ***building and construction sector.***

The exhibition served as a focused business environment where manufacturers, suppliers and solution providers engaged directly with contractors, developers, architects, engineers, consultants, distributors, dealers, importers and project professionals from Nepal and international markets.

Across four days, participating companies presented solutions for residential, commercial, hospitality, industrial and infrastructure applications. The exhibition floor featured building materials, architectural systems, construction machinery, interior products, surfaces, hardware, sanitary solutions, electrical products and emerging construction technologies.

Visitors used the platform to examine products, compare technical solutions, discuss project requirements and understand practical applications directly from manufacturers and authorised representatives.

For exhibitors, the event created opportunities to introduce new products, strengthen market visibility, expand distribution networks and develop commercial relationships within Nepal.

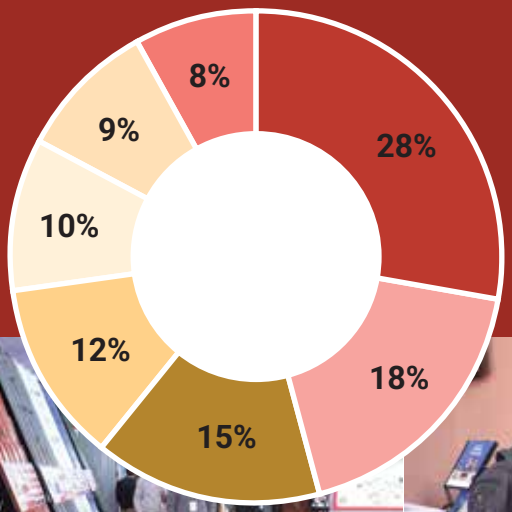

The 11th edition reflected a market actively seeking dependable products, practical technologies and stronger access to suppliers across the construction value chain.

The exhibition floor became a working view of Nepal's building market—what it buys, what it specifies and where it is heading.

Visitor Highlights

20,000+ Business & Trade Visitors Attended

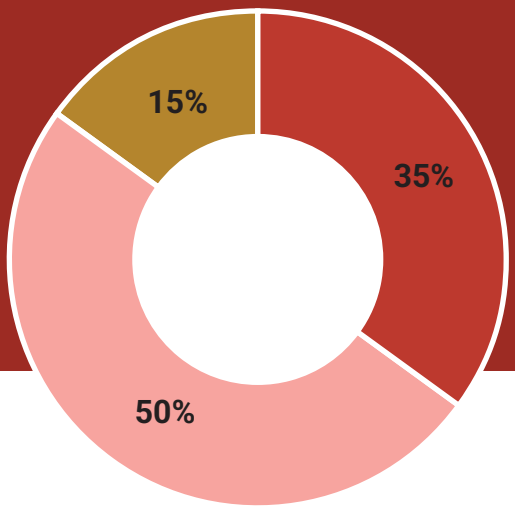

- Contractors & Builders
- Real Estate Developers
- Distributors & Dealers
- Architects & Consultants

- Security And Automation
- Elevators And Mobility Systems

WHAT VISITORS SAID

Experiences from Across the Exhibition Floor

Visitors valued the opportunity to explore a wide range of products, compare suppliers, discuss technical requirements and discover solutions relevant to ongoing and upcoming projects.

"The exhibition brought many product categories and suppliers together in one place, making it easier to compare options and identify suitable solutions for our projects."

Contractor & Project Visitor

"Direct interaction with manufacturers and technical representatives helped us understand product applications, specifications and availability more clearly."

Architect & Consultant

"The variety of building materials, hardware, machinery and interior products gave us a useful overview of what is currently available in the market."

Developer & Business Visitor

"We discovered several new suppliers and products that we plan to evaluate further after the exhibition."

Distributor & Dealer

"The event was well attended and provided a productive environment for meeting companies, discussing requirements and developing new business contacts."

Importer & Trade Visitor

"Nepal Buildcon continues to be an important platform for professionals who want to stay informed about new products and developments in the construction industry."

Engineer & Project Professional

Product Discovery, Technical Discussions and New Business Connections—All Under One Roof
